Important Websites for Your Bookmarks

There are a lot of websites out there for consumer shooters, and a lot of sites by those wanting to sell you stuff.

This is a list of Professional Photography sites that are for commercial and editorial photographers. Some are blogs and some are rep sites where you can see ad and design photography IN USE. This is a great way to stay up on what is happening in the big leagues.

Be informed – and if you have some to be added – do it in the comments and I will indeed add them.
